I have no clue what the source of the site list you provided is, but the University of Illinois has not operated an open burn/open detonation unit for probably 20 years. The unit has yet to be closed because it is in the middle of an active police training firing range. The University of Illinois has a RCRA permit and there is a provision in the permit allowing for the delay of closure of the unit.

The question regarding the cost of closing an OB/OD unit is going to be dependent on whether you are talking about an old unit or a new unit. New units typically are located on concrete, so there should not be a whole lot of expense in closing the unit.

In Illinois, we have one RCRA permitted facility with an open burn/open detonation unit (Process Code X01).

	IEPA ID No.	USEPA ID No.	Closure Cost Estimate
Dyno-Nobel	1818995004	ILD982624777	\$68,190 (2010 dollars)

The reason for the low closure cost is that the open burn/open detonation activities is carried out on a concrete pad. In addition, the permit requires that all ash from the open burn/open detonation process be removed as soon as possible after the burn is complete.

There have been other interim status X01 units that have underwent closure—however, we do not have any information regarding closure costs.

Jim

Region 4 is collecting information of OB/OD sites in states.

Can you review the OB/OD sites listed in the attached spreadsheet to determine whether any sites should be added or deleted (due to closure or inactive)?

Can you also tell me whether you have enough information to determine the closure cost associated such listed OB/OD units?

Let me know

Thanks
Jim

Subject: FW: list of OB/OD sites from EPA intern files

Besides the information below (see the highlighted information wanted from the contractor), we are also looking for the Subpart X Workgroup to assist with identifying:

- Which of the sites listed in the attached spreadsheet have enough data to document the costs associated with OB/OD units?
